

## Amendment sheet for DANISH Product Standard

Amendments are marked in yellow.

*Amended January 2016*

Front page:

2015 changed to 2016

Version 2 changed to Version 1

Page 3: New point

1.6 Pigs that have been in contact with collecting points may not be moved to a DANISH-approved herd.

Page 4: New point

2.8 Blood plasma or products containing products from pigs, apart from pig fat, may only be used if they have been sourced from accredited suppliers listed at [www.danish.lf.dk](http://www.danish.lf.dk).

Page 11: New point

9.3 The producer must be familiar with SEGES, the Danish Pig Research Centre's delivery recommendations in respect of optimal protection against infection.

*Amended June 2015*

Page 14: New points inserted after "2.0 Rules for participation in the scheme":

2.1 In the event of serious or repeated violation(s) of the Danish Product Standard rules, DANISH Product Standard approval may be withdrawn without further notice.

2.2 Particularly serious violations are, for example, but not limited to:

- Pigs introduced into the approved CHR number, which are not DANISH approved
- Sows are not loose-housed for four weeks after service and one week before expected farrowing
- Neglect
- Repetition of non-compliance with the 48 hour quarantine period if this is required

2.3 In the event of other violations, the DANISH Product Standard approval may be suspended. Before a suspension becomes effective, the owner of the CHR number has the opportunity to provide a statement within the stipulated deadline set by the auditing company.

2.4 If the conditions that resulted in the suspension are not rectified and approved by the auditing company, the DANISH Product Standard will be withdrawn.

2.5 Suspension and withdrawal and Danish Product Standard approval will be noted in the SPF-SuS database. The relevant slaughterhouse or trader will be informed accordingly.

The previous points 2.1 to 2.14 have been amended to 2.6 to 2.19

*Amended January 2015*

Page 11: Delivery of pigs

New point 9.8

After a red wash-certificate has been issued, a 48-hour quarantine must be observed before arriving at a Danish herd. Collection centres are exempt from the quarantine rules.

Vehicles with a green wash-certificate are allowed to drive directly to a Danish herd. If animals are offloaded in Denmark, a 48-hour quarantine must be observed.

Former 9.8 changed to 9.9

Point 9.9

Prior to arrival at a Danish herd, vehicles must observe a 48-hour quarantine after cleaning and disinfection on an approved cleaning and disinfection station, if within the previous 7 days the vehicles have driven through high risk areas for diseases such as swine fever and foot and mouth disease. Specific high risk areas are listed on [www.danish.lf.dk](http://www.danish.lf.dk). This list is updated on an ongoing basis.

Former 9.9 changed to 9.10

*Amended October 2014*

Front page:  
January 2014 changed to October 2014

Page 2: EN 44011 changed to EN 17065 (two places)

3.7 (addition)

...

Cephalosporins may not be used unless special dispensation has been granted by the Danish Pig Research Centre.

Two new paragraphs in the section 'Herds with health advice agreements':

3.19

The person responsible for the herd shall prepare a zoonotic infection protection plan with the specific purpose of prevent the spread of infection from the herd. An example of an infection protection plan can be found at [www.vsp.lf.dk](http://www.vsp.lf.dk)

### 3.20

Any human access to and from the herd must be made through an anteroom.

The anteroom must be equipped with the following facilities:

- washbasin
- hand soap
- hand disinfection
- disposable hand towels
- changing area (to change into work clothes or protective clothing for use in the herd)
- changing or washing and disinfection facilities for footwear and equipment

The anteroom requirement does not apply for human access to and from herds which stay partly or completely in outdoors.

Former 3.19 changed to 3.21

Former 3.20 changed to 3.22

### 9.6

Deleted

### 9.7

Begins with:

Only DANISH-approved hauliers should be used. The list of approved hauliers and exporters can be found at [www.danish.lf.dk](http://www.danish.lf.dk).

...

3 years -> 2 years (in penultimate line).

Former 9.7 changed to 9.6

Former 9.8 changed to 9.7

Former 9.9 changed to 9.8

Former 9.10 changed to 9.9

### 10.5

3 years -> 2 years (in third line).

The word "trader", is replaced with the word "distributor" throughout the standard.

*Amended January 2014*

Front page:

2013 amended to 2014

### 1.4

All pigs sent for slaughter must be clearly tattooed with the supplier number and pigs sent for export must be marked with ear tags.

If the herd is registered in the Central Husbandry Register (CHR) for group delivery, group delivery of finishers is permitted insofar that finishers, by agreement with the herd owner and the slaughterhouse, may be transported directly from the herd to a slaughterhouse in Denmark without an approved ear tag or tattoo.

### 3.13

A logbook recording medical treatment must be kept. When supplying medicine, the veterinarian shall provide written instructions on the treatment and withdrawal period.

The following must be reported:

Date, animal – which and how many, reason, medicine, dosage, administration method and the initials of the person who has provided the treatment.

### 8.13

With effect from 1 April 2014, marking colours used in the herd must be food approved/FDA labelled.

## Rules for participation in the DANISH Product Standard

2.7 new point 2.7 in Rules for participation in the DANISH Product Standard

The visit can be unannounced with a warning of no more than 48 hours in order to ensure that the owner is present and prepared.

Unannounced visits can neither be moved nor refused.

(Existing points from 2.7 – 2.13 are all increased by one number – i.e. 2.9 becomes 2.10.)

*Amended September 2013*

9.8

Vehicles coming from abroad must observe a 48 hour quarantine period from the time of washing and disinfection at an approved washing and disinfection area, before arrival at the Danish herd, if animals are to be moved between herds in Denmark.

9.9

The 48 hour quarantine period must be observed, from the time of washing and disinfection at an approved washing and disinfection area, if the vehicle has passed through areas with a special risk of diseases such as swine fever and foot-and-mouth. The list of specific risk areas can be found at [www.danish.lf.dk](http://www.danish.lf.dk).

The list will be updated on an ongoing basis.

9.10

Producers must ensure that all transport of live pigs from DANISH approved herds between Danish herds, for slaughtering in Denmark or for export must be undertaken by QS certified hauliers. The German quality system, QS, requires that all hauliers of live animals from DANISH approved herds are QS certified.

Own vehicles are QS approved through their DANISH certification. Hauliers approved under the DANISH Transport Standards are automatically QS certified.

The list of QS certified hauliers is available at <https://www.gs-plattform.de/QSSoftware/search.html> lists. [www.danish.lf.dk](http://www.danish.lf.dk) contains a list of DANISH Transport approved hauliers
